

CARE INSTRUCTIONS

Microphone windshields are an important pieces of equipment which are used to suppress wind and "pop" noises, please follow the advice below to maximise the life of your product.

Usage

Please handle the windshields carefully, each windshield is manufactured to fit specific microphones, using a windshield on a larger windshield can cause damage to the windshield and the print.

Storage

Humidity can affect the durability of the logo. Please do not store windshields in a sealed bag or case.

If the windshield get wet please allow to dry naturally in a well ventilated cool area.

Try to avoid windshield becoming too hot, if the windshields do get hot allow to cool before handling

Cleaning:

Never use strong cleaning agents, antibacterial agents or hot water to clean the windshields as this will damage the logos.

If the windshields become dirty gently wipe or brush away the dirt. If very soiled carefully use luke warm water to wash the windshield and allow to air dry completely afterwards. Do not wash in washing machine or dry in tumble dryer.
